

SAI CHARAN G

Senior DevOps Engineer | 5+ Years Experience

+91-7330922247 | saicharan.cloudops@gmail.com | LinkedIn: [G saicharan Reddy](#)

PROFESSIONAL SUMMARY

Results-driven Senior DevOps Engineer with 5+ years of hands-on experience designing, automating, and managing scalable cloud infrastructure and CI/CD pipelines for high availability Enterprise Platforms. Proven expertise in Kubernetes, Docker, Terraform, and cloud-native technologies. Demonstrated ability to reduce deployment time, improve release frequency, ensure high availability, and eliminate operational overhead through Infrastructure as Code (IaC) and GitOps practices. Experienced in supporting enterprise-grade systems across Media, Banking/Financial services, and Transportation/Logistics.

TECHNICAL SKILLS

Cloud Platforms: Azure, AWS (EC2, S3, RDS, IAM, VPC, ELB, Route 53, CloudWatch, CloudTrail, Auto Scaling, Lambda, AWS Transit Gateway, KMS, WAF, Secrets Manager)

Generative AI Integration: Utilized Generative AI tools such as Amazon Bedrock, and GitHub Copilot to support DevOps activities including CI/CD pipeline analysis, Terraform/Ansible code generation, Linux troubleshooting, log **analysis**, and root-cause identification

Containerization & Orchestration: Docker, Kubernetes, Amazon EKS, Openshift

CI/CD Tools: Jenkins, Argo CD, Azure DevOps (ADO) Pipelines

Build and Artifact Tools: Maven, Nexus Artifact Repository

Infrastructure as Code (IaC): Terraform

Configuration Management: Ansible

Monitoring & Observability: Prometheus, Grafana, Datadog, AWS CloudWatch

Scripting & Automation: Bash, Shell Scripting, Python

Version Control: Git, GitHub, Bitbucket

Web Servers: Nginx, Apache, Apache Tomcat

Databases: MySQL, AWS RDS, MariaDB, MongoDB (NoSQL)

Operating Systems: Linux (Ubuntu, CentOS), Windows Server

Project and Collaboration Tools: Jira, Confluence

Security & Compliance: IAM Roles & Policies, VPC Security Groups, AWS CloudTrail Auditing

DevSecOps: SonarQube, secrets scanning

KEY ACHIEVEMENTS

- Investigated intermittent 502 errors in an EKS application exposed through an AWS Load Balancer during scaling events.
- Analyzed load balancer traffic, Kubernetes events, service endpoints, pod logs, and pod behavior.
- Identified that traffic was reaching terminating pods during scale-down, while scale-up remained unaffected.
- Implemented health probes and graceful pod termination, ensuring clean deregistration and eliminating 502 errors.

PROFESSIONAL EXPERIENCE

ANTS IT Solutions Pvt Ltd | Senior DevOps Engineer

Jan 2023 – Present

Project 3: Recast (media)

Duration: Dec2024 – Present | Role: Senior DevOps Engineer

- Designed and maintained **CI/CD pipelines using Jenkins and GitHub Actions** for automated builds, testing, and multi-environment deployments.
- Provisioned and managed **AWS infrastructure using Terraform (IaC)**, including EC2, VPC, RDS, IAM, Auto Scaling, Load Balancers, S3, CloudFront, and Route 53.
- Deployed and scaled containerized microservices on **Amazon EKS using Docker, ECR, and Helm**, with GitOps delivery through Argo CD.
- Implemented **Prometheus and Grafana for monitoring**, dashboards, alerting, and supporting high availability.
- Designed secure multi-account AWS networking using **Transit Gateway, VPC Peering**, and security group hardening.

- Automated **server configuration, patching, and application deployments using Ansible**, reducing manual intervention by 65%.
- Collaborated with **development, QA, and security teams to improve SDLC**, scalability, reliability, and cloud operations.

Project 2: Airwallex (Banking and Financial Services)

Duration: Jan 2023 – Nov 2024 | Role: DevOps Engineer

Domain: FinTech – Global Payments and Financial Platform

- Built and maintained Jenkins CI/CD pipelines integrated with **Git** and **Maven** to automate application builds, testing, and multi-environment deployments.
- Provisioned and managed highly available AWS infrastructure using **EC2, Auto Scaling Groups, Elastic Load Balancing, IAM, Amazon Aurora, DB subnet groups**, and **Multi-AZ** deployments.
- Scaled containerized **AI inference workloads** and **data pipelines** on **Amazon EKS**, orchestrating model service endpoints, MongoDB caching, and Auto Scaling for **low-latency** batch and real-time processing.
- Containerized applications using **Docker** and **orchestrated workloads on Kubernetes** to improve scalability and resource utilization.
- Automated server configuration, software installation, and compliance activities using **Ansible roles, playbooks**, and **Ansible Tower**.
- Implemented **Amazon S3 Lifecycle policies**, Intelligent-Tiering, and versioning to optimize cloud-storage costs.
- Configured **CloudWatch** dashboards, alarms, and **log groups**, and supported **disaster-recovery planning** and **RTO/RPO** testing to improve monitoring and application resilience.

Cognizant Technology Solutions Pvt Ltd | DevOps Engineer

Project 1: WorkWave (Transportation and Logistics) | AWS | Azure

Duration: July 2021 - December 2022 | Role: DevOps Engineer

- Collaborated with client teams to understand deployment requests and coordinated with **Development, DBA, QA**, and IT Operations teams to prevent resource conflicts.
- Worked with Project Managers to define code and configuration release scope, deployment requirements, and release success criteria.
- Created and maintained Jira issues to prioritize work, track project activities, and keep teams informed about progress.
- Built, managed, and continuously improved build and deployment infrastructure for global software development teams.
- Implemented CI/CD processes using **Jenkins, Git**, and **Maven**, including automated build, testing, and deployment scripts across multiple environments.
- Administered **Jenkins pipelines** for weekly **build, test**, and **deployment** activities using Dev, Test, and Production Git branching strategies.
- Managed AWS services, including **S3 bucket policies**, Glacier storage classes, **SNS** notifications, **CloudWatch** monitoring, **RDS** access, and **EBS** volume alarms.

EDUCATION

Bachelor of Technology (B.Tech)

Graduated 2019

CORE COMPETENCIES

Cloud Infrastructure Management | DevOps Automation | CI/CD Pipeline Design | Kubernetes Cluster Administration | Docker Containerization | GitOps | Terraform IaC | Ansible Configuration Management | AWS Cloud Services | Site Reliability Engineering (SRE) | Agile/Scrum | Linux Administration | System Monitoring | High Availability Architecture | Disaster Recovery | Microservices | Serverless Computing | Cost Optimization | Security Hardening | Release Management
